EXPERIENCE

Full Stack developer

📅 september 2025 – actually
📍 Madrid

Mercanza

- Full-stack application development with React, devExtrem and .NET Core (C#). Creation of RESTful APIs, data management with Entity Framework. Responsible for the full lifecycle of the applications, from development to deployment and maintenance.
- External Instructor – Markup Languages & Development Environments (DAM / DAW)

Front End developer

📅 january 2025 – august 2025
📍 Paris, remote

Barnabé

- Frontend development of two complete web applications for a real estate startup using Angular 19, TypeScript, and Tailwind. I led the UI/UX design with Figma and handled the full frontend implementation using Components, Directives, Pipes, NgXS, and Signals. I implemented a scalable architecture (Ports & Adapters) and optimized application performance. Managing the lifecycle, from wireframes to production.

Front End developer

📅 august 2024 – august 2025
📍 Remote

Freelance

Design and development of multiple web applications using TypeScript, React and Next.js, focusing on clean architecture and reusability

- BatiCloud – Artisan management dashboard built with hexagonal architecture (Ports & Adapters) and reusable components.
- La Escuelita – Volunteer session management platform with Next.js, Clerk, Prisma, and TanStack Query.

Physics and chemistry teacher

📅 august 2011 – august 2024
📍 France - Venezuela - Peru

French International Schools

- Taught physics at the secondary level in multicultural environments.

EDUCATION

Web application development (RNCP5)

📅 2024
📍 Barcelona, Spain

Epitech

- Learned algorithmic thinking and problem-solving. Built dynamic RESTful APIs using React.js, Angular, Node.js, MySQL

Master's Degree in Physics and Chemistry

📅 2010
📍 Paris, France

University of Paris-Saclay

- Developed strong analytical and problem-solving skills through laboratory work and theoretical studies. Focus on scientific rigor.

SUMMARY

French Front End developer with a background in physics, specializing in TypeScript.

Experienced in building web applications with Angular, React, Next.js, Node.js and .NET Core C#. Resident in Spain.

LAST PROJECTS

Real estate agency platform - Barnabé

Stack : Angular 19 / TypeScript / Tailwind.
